AnteRoom

The award-winning HEPACART® AnteRoom Classic is an temporary room isolation module that serves as an entryway or vestibule into any larger room undergoing maintenance, renovation or construction. **It installs in less than five minutes and pays for itself after just one project. See for yourself here (video).**

The AnteRoom Classic provides total room isolation, a containment measure that mitigates patient risk from work dust and related contaminants. With external negative air machine adapters on either side of the enclosure, the AnteRoom Classic provides air filtration, dust collection, and infection control.

The AnteRoom Classic meet the requirements of ICRA Class V specifications where contractors or maintenance workers must construct an anteroom that allows for adequate isolation of the work environment and negative airflow.
